

# Wireless Direct Drive w/ Auto-Stop & Auto-Run Motor

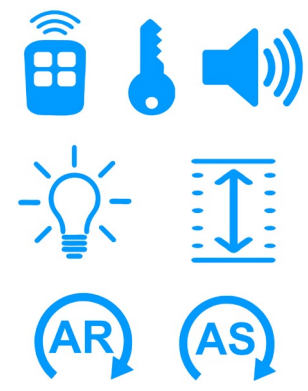

Models Available in: AC 120v & DC 12/24 Power Input

**NEW!** Lake Lifter's Direct Drive Boat Lift Motor with Wireless Remote, Auto-Stop, and Auto-Run available in AC 120v or DC 12/24v models. This motor has all the bells and whistles you could ever need including the key feature of user-programmable AUTOMATIC limits for lowering and lifting your boat preventing any potential damage to the winch box, cable or boat lift. Use the guided EV1 Voice Assistant integrated within the motor, controlled and activated by the Wireless Key Fobs to set the limits, and the lift "remembers" the upper and lower positions for future use. This intelligent EV1 smart technology stops at the exact limits every time with zero drift, regardless of any slight variations in the motor speed affected by voltage, persons or weight on the boat lift. The Direct Drive Boat Lift Motor will fit ANY boat lift that has a wheel. Instructions are illustrated, simple and installation takes 20 minutes or less.

## KEY FEATURES

- ✓ Quick & Easy Installation
