

NOTE: DO NOT use rope as it may fray from constant twisting/turning/cinder block rubbing, etc.. Please use metal chain for best results!

Anchor Weight at bottom
1- Cinder block
25-28kg (55-60 lbs)

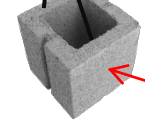

Lake Bottom

Drift Chain

Weight Chain

Ballast Weight
½ Cinder Block
13kg (25-30lbs)

NOTE: the Ballast Pole is designed to flex and absorb light forces differences between the buoy and the directional change of the ballast weight. This “helps” prevent damage from LIGHT impact and or wave forces present on the buoy. The BUOY IS NOT warranted against impacts!

Spring Flex Ballast Pole
Absorbs light forces
