

Solar Bumper Light – New Bumper Designs

LAKE LITE: 100 Industrial Drive, Avilla IN 46710 Ph: 260-918-2758 Email: sales@lakelite.com

NOTICE: Please note that some dock bumpers may require slight modification with the newer style bumpers for a secure fit of the Solar Bumper Light. To ensure a snug fit, we recommend using an exacto knife to lightly shave approximately 1/16th inch off the top inch of the bumper post. This will allow the solar bumper light to slide easily into place. It is important to take caution while using the exacto knife to avoid injury.

TOP OF BUMPER

Roughly an inch down on each side of the protruded bumper, shave 1/16th inch off to snugly fit cap
